Portrait and Unit skins are decent enough. Shame there's not more of them - very doubtful that there's enough content in this pack to justify buying this at the full price.

As long as you're buying this during a Steam Sale, however, there are far stupider things out there that I've spent \$3 US on. Tentative recommend as long as it's on sale.. I know many of the DLC have gotten crap as of late but I recommend this one alone for the music tracks because they are so good. Currently I am playing as Wessex and purposely incorporated in Bolgar into my bloodline just to have the tracks appear.

The portraits are great as well and adds flavor.

If money is the problem, just add it to your wishlist like I do and wait for a sale. It always comes around sooner or later.

Thumbs up for sure for sales!. This content pack is worth it just for the excellent music.. They split the DLC into 2 so you also can feel like being robbed and looted by Mongol Hordes.. It is as advertised, but to be completely honest, I personally only bought this because it said "Crusader Kings 2 dlc" when I clicked on it. I didn't buy this because of the portraits or Mongol units, I doubt I'll spend much time in the basin even with Horse Lords. They look like mongols though, and it's quality, so if that's what you're looking for it's there. I didn't buy this for early Frankish units, because we already had early units, and the start dates before 1066 are kind of iffy anyway. I didn't buy this for the Italian units, although it was pretty great that they got to stop being Iberian after they stopped being French. I didn't even buy this for the music scores, which are excellent as always. Setting apart cultures to give a unique experience is nice. Those other things are nice, and with a few glaring exceptions, they're always nice, and if you want those things and think they're worth six dollars because Paradox decided they should all be sold together under one label, I couldn't recommend this more, but if you're buying this for the same reasons I did, I'd recommend waiting until it goes on sale. Your wallet will thank you.. Not worth it for the price.. Because why sell all the content for Horse Lords in one dlc when you can split into TWO dlc?

Hahaaa, genius. I thought selling Common Sense as an e-book was shameless enough.

I don't want to buy your crappy four song DLCs. Get rid of them. Why is this not at a discount? the three separate items would still amount to \$6, so you're making me pay 2 extra dollars for something I don't want. Steam is a DIGITAL retailer, they don't have to free up shelf space for these content packs, so there's no reason they should be separate. This is a scam. Everyone knows it's a fraud. You're going to kill your stupid Eurotrash company for no reason. Get it? Is your hair growing inside rather than out?. It probably should be cheaper, but the content here is enjoyable.. While CK2 music is already really good, I did find the new Songs of the Steeps to be among the best and does improve a lot on immersion and does felt very different from the rest of the game soundtrack. The pack also come with a lot of new sprites for units (many for early frank, german and italians and off course, mongols) along with a new Cuman portrait pack. Which make this pack really worth.

Paradox, you are lucky that I love you more than my wallet

Overall, worth buying if you love the game and would like an extra level of immersion.. DLC weighs down my every thought. How can I send my children to school now that I've given Paradox their tuition money for endless DLC???. It really is pretty baffling that you pay 15 bucks for HORSE LORDS, and then they ask you to pay 6 MORE bucks for the portraits and unit graphics.

Seriously. That's like me going to the grocery, buying a loaf of bread and they ask me to pay an extra 50 cents for the bag that the bread is in. Or buying a car, getting it home and then getting a bill a month later for the paint job.. An excellent addition to the game. Not historically accurate, as clans were far less important than aristocracies in Inner Asia, particularly the Mongol Empire. Nevertheless, the expansion of the map to Mongolia and expansion of play types are much appreciated.. i bought this because i mistakenly thought it was the expansion. thanks paradox.
